Dear sir/madam

       I am Chawintee Muennarong. I would like to apply the position of backend developer. Considering my relevant experience, I worked as a backend developer by using node.js and mongoDB. During this one-year experience, I have worked with receiving requirement , backend by nest, frontend with svelte, also another projects using sveltekit. I am currently looking for an opportunity as a backend developer on my career. Considering that I have an interest in this field, I believe I would perform well on my tasks, also seeing a huge career oppprtunity in the future.
